

SLIDE & STACK PARTITION SYSTEM HSS100

COMPLETE CLEAR – PERFECT SPACE PLANNING

ACCESSCO Slide & Stack Partition System HSS100 is the perfect solution in total space planning design. Its design integrates seamlessly with the aesthetic in mind – creating beautiful designs in space areas with limitations or constraints.

The HSS100 can be flexibly adapted into a wide range of applications, design concepts, structural environment and interior design perspective. It is well received by many Designers and Owners as spacious areas can be easily compartmentalized into segments in just a matter of seconds. This helps to save time and allow them to have the function they have in mind.

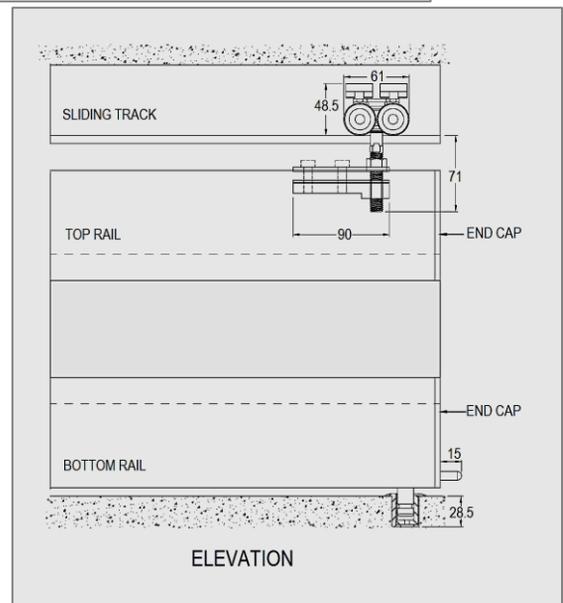

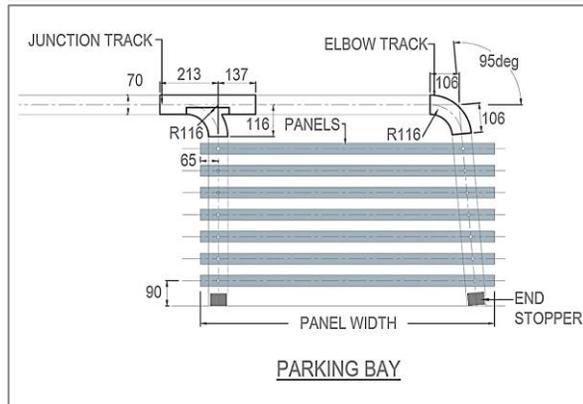

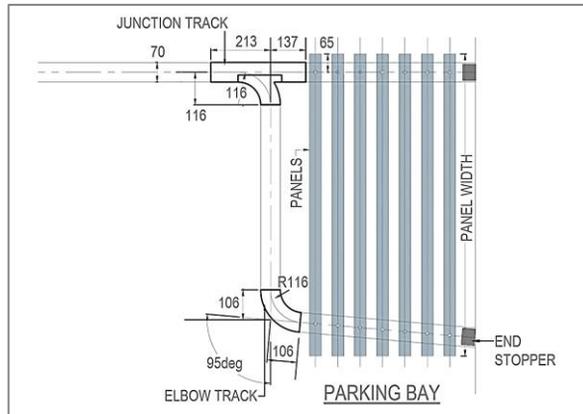

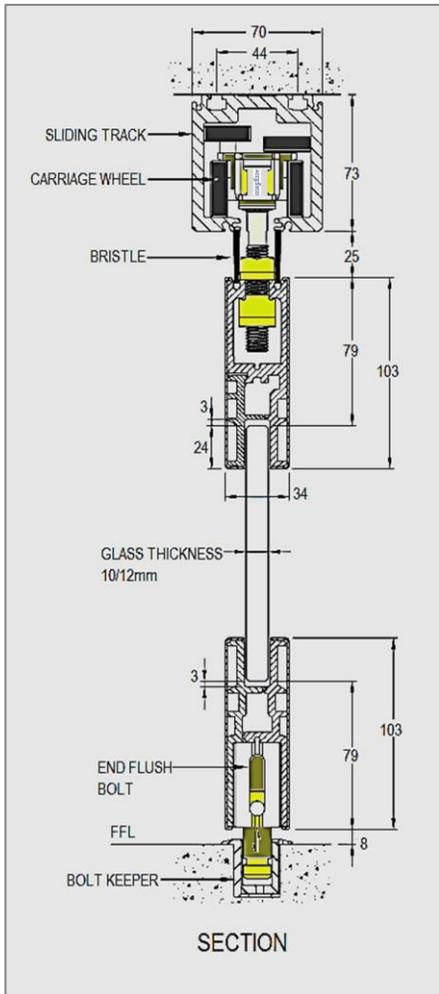

The system can also be easily and perfectly aligned with the décor of an integrated façade and interior design frontage. It is equally suitable for both renovation and new construction project.

The HSS100 is widely demanded in :

Banking Areas, Airports, Convention Halls, Shopping Malls, Banquet Malls, Restaurants, Retail shops, Hospitals, Clinics, Departmental stores, Offices, Homes and many more.

Although the primary uniqueness of the HSS100 helps to open & create space for the user in mind, it can also be incorporated with a double action pivoted swing door, integrated with a floor closer. This allows continual entry and exit while remaining closed.

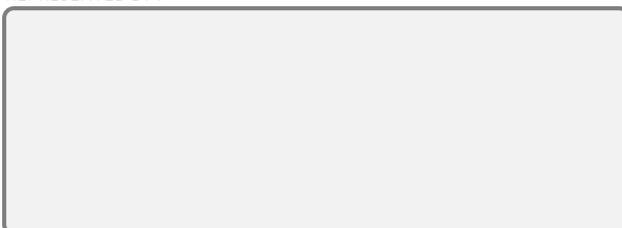

Being able to hide or stack in small compartments when opened makes the overall system blend nicely into any situations. The ease & of utilizing the system as well as the seamless integration into its surroundings makes the HSS100 a very welcoming system to be used in almost any situations.
